

---

# Access to COROT data

## (levels N1, N2 and N3)

### for Cols and Gls

---

N1 data ( $\approx$ 1st order corrections):

- purpose : alarm mode, follow-up observations,  
instrument check, data processing activities (pipeline)  
**Not for scientific analysis!**
- availability : not public, access to Cols in the frame of  
activities listed above, or, on request, for reprocessing  
after the end of a run (when N2 available)
- released when pipeline N0/N1 validated

N2 data (ready-to-use light curves):

- purpose : **scientific analysis!**
- availability : not public for 1 year after release, access to Cols only; then public data
- released when pipeline N1/N2 validated

N3 data (scientific products: transit list, frequency tables...):  
[not yet precisely defined]

- purpose : interpretation of data
- availability : not public until publication (!) in refereed journals; then public data
- released for Cols as soon as ready

## Access for GIs:

- Restricted to a fraction of the whole N2 Corot dataset
- Fraction defined by the CS? A person designated in the CS? The PI?
- Restriction applied at the level of the archive interface (but technically not always simple: please be kind)

N1 and N2 data description : document(s) already available at
